

Robo-Taxis

They are Out of Control & Need to be SHUTDOWN NOW!

The continuing dangers and threats to health and safety emergency on the streets of San Francisco require that the City of San Francisco shutdown these Robo-Taxis run by GM's Cruise and Google's Waymo.

They are a catastrophe waiting to happen as the San Francisco Fire Chief has said, yet Mayor London Breed welcomed the CPUC decision and Governor Gavin Newsom took \$10 million from Google in 2020.

Who are they representing, the tech billionaires or the people of San Francisco? AI technology should benefit the working people and public instead of the billionaires who really run the CPUC and DMV.

The San Francisco Police could immediately impound the cars since they are violating many vehicular codes every hour of every day that they are on the road. They also do not stop for pedestrians unless they are in the street. This is a frontal attack on the enforcement of the vehicle code by these tech companies.

DO WE HAVE TO WAIT FOR A DISASTER?

The Newsom hand-picked California Public Utility Commission and DMV has said that these companies will regulate themselves and under their logic the people of San Francisco are guinea pigs for the testing of AI and the development of these autonomous vehicles.

This technology will also destroy the taxi industry, bleed public transit and eliminate tens of thousands of jobs. It

is the complete privatization of the transportation system with Newsom and the legislature deregulating local control of transit for the tech billionaires whose goal is making profit by getting rid of drivers.

The shutdown of ten Cruise cars in North Beach on Friday August 11 was blamed on the Overland Festival by Cruise because of cell overload. When Waymo killed a dog, they blamed the dog.

Newsom even allowed his appointee John Arnold to vote to allow thousands of robo-taxis on the streets even though Arnold represented GM's Cruise for years as chief counsel. The billionaire streamers are also using AI to destroy SAG-AFTRA and the Writers Guild.

We cannot afford to wait for someone to be injured or die because of another road blockage of these robo-taxis. We need to unite the entire working class in this fight.
